

FORTIFY YOUR WINDOWS WITH SAFETY & SECURITY FILM

- ▶ Provide precious time by impeding unwanted individuals from entering your building
- ▶ Provide added protection to property from smash and grab burglaries
- ▶ Help protect occupants from the hazards of broken glass

Proper installation of security film is essential to its success. For the best, most effective results the film is first adhered to the inside of the glass then a wet glaze silicone attachment system firmly secures the film and frame together. The combination of the security film and the attachment system provides additional security over a window without an attachment system.

Area schools currently protecting their students with Safety & Security Film:

- ▶ Covington County (11 Campuses)
- ▶ Lamar County School District (15 Campuses)
- ▶ Rankin County - Project (28 Campus)
